

Udall Community Breakfast

Udall Community Building Saturday, April 6, 2019

7:00 am – 10:00 am

Pancakes, Biscuits & Gravy,
 Sausage, Bacon, Fried Potatoes,
 Scrambled Eggs & Fruit

Adults \$6.00

Children 12 and under \$4.00

Sponsored by Udall S.U.N. Club

Dog/Cat Tags EXPIRE April 30th

City of Udall Dog and/or Cat tags expire each year on April 30th. There will not be a vaccination clinic provided. Please bring in current rabies vaccination information from your veterinarian when you purchase your new license(s).

There is a \$15.00 late fee (per animal) after April 30th.

	Spayed or Neutered	Not Spayed or Neutered
Dogs	\$5.00	\$10.00
Cats	\$5.00	\$10.00

Mulvane Animal Clinic is offering reduced prices April 15th-27th.

Mon – Sat	8-11:30 am
Mon-Wed	1:30-6:00 pm
Fri	1:30-5:00 pm

Ask for Udall/Belle Plaine Pricing:

	<u>K-9</u>	<u>Feline</u>
Rabies	\$12.00	\$12.00
DA2PP	\$25.00	\$18.00
Bordatella	\$15.00	\$18.00

Happy 30th Anniversary

Countryview Baptist Celebrating 30 years

When: Sunday May 5th Service at 11am

Dinner at 12:30pm

Where: 3795 52nd Road

Udall, Ks 67146

Guest Speaker: Evangelist Shannon Scott

REGULAR COUNCIL MEETING

CITY OF UDALL

Monday, February 11, 2019

The Udall City Council met for the Regular Council Meeting on Monday, February 11, 2019, at 6:30 p.m., at the city building. Stephen R. Brown, Mayor, called the meeting to order. Michael Graham, Jason Tharp, and Damon Wilson. Quorum established. Also present were Kristen McReynolds, Norma Ciskowski, Hannah Hoffman, Layna Adams, Drake Lette, Eric Allen, Erik King, and Lulita Hopkins. Swearing in of new Council Member, Janette Adams, by City Clerk Lulita Hopkins.

MODIFICATION OF AGENDA: It was discussed to remove Item #1 from New Business.

CONSENT AGENDA:

MOTION: by Tharp, second by Wilson, to approve the consent agenda including the Clerks and Treasurer's Reports for January 2019, the minutes of January 14, 2018, Expenditure Report of \$121,398.77 and Payroll Account Report Totals of \$16,532.57. Motion passed.

OLD BUSINESS:

1. City Park Walking Path – guidelines have not been provided by Sunflower. Will need specifics to complete bid information and grant application.
2. Street Resurfacing Bid from Flint Hills Materials – amended bid specification. The amended bid information included 2 inch asphalt on 1st Street from Williams to North Clark, and Main St to Seymour; 4 inch asphalt on 1st Street from East Street to Main street for the previous bid price of \$145,922.00.

MOTION: by Graham, second by Wilson, to approve the bid by Flint Hills Materials in the amount of \$145,922.00. All voted aye, motion carried.

NEW BUSINESS:

1. The item removed, replacement of manhole cover on Clark St, was due to finding a less expensive replacement part.

COUNCIL MEMBER REPORTS:

Tharp – Had questions about water meter shut-off procedures.

Brown – Cowley RISE will be attending the next work session on March 6 at 6:00 p.m. This will be a community discussion about community needs and explore ideas for collaboration.

STAFF REPORTS:

King – Requested NCSA training in Olathe, KS. Registration is \$350 for 4 days of training beginning April 29th.

MOTION: by Wilson, second by Tharp, to approve NCSA training for Erik King in Olathe, KS; registration of \$350 and hotel accommodations, and per diem. All voted aye, motion carried.

Allen – Requested KRWA water/waste water training at their March convention held in Wichita.

MOTION: by Wilson, second by Graham, to approve KRWA registration for Eric Allen and Dennis White of \$410 each.

MOTION: by Wilson, second by Graham, to adjourn. Motion carried. Meeting adjourned. Lulita Hopkins, City Clerk

BLESSINGS from the SECOND BLESSING GARMENTS CLOTHES CLOSET! Our **April opening is Saturday, April 13th from 9:00 AM to noon. Happy Easter!** We have men's shirts, ladies' blouses and dresses, jeans, juniors', children's and baby clothing. We would love to have you stop by to browse and visit. New items are put out every month. We have quality clothing for the entire family. There is never any charge for any of the items. Freewill donations are accepted. We are a compassionate ministry of the *Udall Church of the Nazarene*. We always gladly accept donations of clean good clothing. ***Please NO household items or toys!!*** If you have any questions, want to donate clothing, or have an emergency clothing need; please call (316) 214-9240. This community outreach is open on the second Saturday of each month from 9:00 AM to noon in the church annex at 2nd & Church streets. Church office – 782-3683. We are a division of the international compassionate ministry *Hope Compassion Outpost – USA/Int'l*.

From the Library . . .

The Udall Book Club shall meet in the Udall Public Library on April 9th at 1:30 pm to share the book "The Tail of the Tip-Off" by Rita Mae Brown – all are welcomed to attend!

Books & Babies shall meet again on April 18th at 1:00 am to 10:45 am. All children up to 3 years can come. Miss Sharon Hooker is well trained and loves kids. Sponsored by the Udall School District.

We are so lucky to still be able to receive books from the South Central Library System. April 3rd is our next delivery. Books are to be on the shelf the next day – do feel free to come and look them over!

Udall Public Library will observe National Library Week April 9th thru 13th.

Udall Public Library

OPEN Tues, Thur, Friday
3:00 to 6:00 pm

Wednesday & Saturday
10:00 am to 1:00 pm

CLOSED Sunday & Monday

City of Udall Annual Water Quality Report is available online https://www.municipalimpact.com/documents/130/2019_CCR_covering2018.pdf This report contains important information about the source and quality of your drinking water. Please call (620)782-3512 if you would like a paper report delivered to your home.

Testing Results for: CITY OF UDALL

CITY OF UDALL Consumer Confidence Report – 2019 Covering Calendar Year – 2018

This brochure is a snapshot of the quality of the water that we provided last year. Indicated are the details about where your water comes from, what it contains, and how it compares to Environmental Protection Agency (EPA) and state standards. We are committed to providing you with information because informed customers are our best allies. If you would like to observe the decision-making process that affect drinking water quality, please call STEVE BROWN at 620-782-3512.

Your water comes from 3 Ground Water Wells:

Source Name	Source Water Type
No other sources to display.	

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as those with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in sources water before we treat it include: **Microbial contaminants**, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, livestock operations and wildlife. **Inorganic contaminants**, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming. **Pesticides and herbicides**, which may come from a variety of sources such as storm water runoff, agriculture, and residential uses. **Radionuclide contaminants**, which can be naturally occurring or the result of mining activity.

Organic contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and also come from gas stations, urban storm water runoff, and septic systems.

In order to ensure that tap water is safe to drink, EPA prescribes regulation which limits the amount of certain contaminants in water provided by public water systems. We treat our water according to EPA's regulations. Food and Drug Administration regulations establish limits for contaminants in bottled water, which must provide the same protection for public health.

Our water system is required to test a minimum of 2 samples per month in accordance with the Total Coliform Rule for microbiological contaminants. Coliform bacteria are usually harmless, but their presence in water can be an indication of disease-causing bacteria. When coliform bacteria are found, special follow-up tests are done to determine if harmful bacteria are present in the water supply. If this limit is exceeded, the water supplier must notify the public.

Water Quality Data

The following tables list all of the drinking water contaminants which were detected during the 2018 calendar year. The presence of these contaminants does not necessarily indicate the water poses a health risk. Unless noted, the data presented in this table is from the testing done January 1- December 31, 2018. The state requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year. Some of the data, though representative of the water quality is more than one year old. **The bottom line is that the water that is provided to you is safe.**

Terms & Abbreviations

Maximum Contaminant Level Goal (MCLG): the "Goal" is the level of a contaminant in drinking water below which there is no known or expected risk to human health. MCLGs allow for a margin of safety.

Maximum Contaminant Level (MCL): the "Maximum Allowed" MCL is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Secondary Maximum Contaminant Level (SMCL): recommended level for a contaminant that is not regulated and has no MCL.

Action Level (AL): the concentration of a contaminant that, if exceeded, triggers treatment or other requirements.

Treatment Technique (TT): a required process intended to reduce levels of a contaminant in drinking water.

Maximum Residual Disinfectant Level (MRDL): the highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Non-Detects (ND): lab analysis indicates that the contaminant is not present.

Parts per Billion (ppb) or milligrams per liter (mg/l)

PicoCurie per Liter (pCi/L): a measure of the radioactivity in water.

Millirems per Year (mrem/yr): measure of radiation absorbed by the body.

Monitoring Period Average (MPA): An average of sample results obtained during a defined time frame, common examples of monitoring periods are monthly, quarterly and yearly.

Nephelometric Turbidity Unit (NTU): a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person. Turbidity is not regulated for groundwater systems.

Running Annual Average (RAA): an average of sample results obtained over the most current 12 months and used to determine compliance with MCLs.

Locational Running Annual Average (LRAA): Average of sample analytical results for samples taken at a particular monitoring location during the previous four calendar quarters.

Microbiological	Result	MCL	MCLG	Typical Source
No Detected Results were Found in the Calendar Year of 2018				
Regulated Contaminants	Collection Date	Range (low/high)	MCL	MCLG
ARSENIC	4/4/2018	2	10	0
BARIUM	4/4/2018	0.19	2	2
CHROMIUM	4/4/2018	1.4	100	100
FLUORIDE	4/4/2018	0.16	4	4
NITRATE	4/4/2018	7	10	10
SELENIUM	4/4/2018	3.4	50	50

Disinfection Byproducts	Monitoring Period	Range (low/high)	MCL	MCLG	Typical Source
TOTAL HALOACETIC ACIDS (HAA5)	2018	9	60	0	By-product of drinking water disinfection
THM	2018	34	80	0	By-product of drinking water chlorination

Lead and Copper	Monitoring Period	90 th Percentile	Range (low/high)	Unit	AL	Sites Over AL	Typical Source
COPPER, FREE	2016 - 2018	0.85	0.041 - 1.6	ppm	1.3	1	Corrosion of household plumbing
LEAD	2016 - 2018	1.9	1.4 - 2.1	ppb	15	0	Corrosion of household plumbing

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Your water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

Secondary Contaminants-Non Based Contaminants-No Federal Contaminant Level (MCL) Established.	Collection Date	Highest Value	Range (low/high)	Unit	SMCL
ALKALINITY, TOTAL	4/4/2018	250	250	MG/L	300
CALCIUM	4/4/2018	110	110	MG/L	200
CHLORIDE	4/4/2018	32	32	MG/L	250
CONDUCTIVITY @ 25 C UMHOSCM	4/4/2018	810	810	UMHOSCM	1500
CORROSIVITY	4/4/2018	0.45	0.45	LANG	0
HARDNESS, TOTAL (AS CaCO3)	4/4/2018	340	340	MG/L	400
MAGNESIUM	4/4/2018	17	17	MG/L	150
PH	4/4/2018	7.6	7.6	PH	8.5
PHOSPHORUS, TOTAL	4/4/2018	0.14	0.14	MG/L	6
POTASSIUM	4/4/2018	4.5	4.5	MG/L	100
SILICA	4/4/2018	22	22	MG/L	50
SODIUM	4/4/2018	35	35	MG/L	100
SULFATE	4/4/2018	87	87	MG/L	250
TDS	4/4/2018	480	480	MG/L	500

Please Note: Because of sampling schedules, results may be older than 1 year.

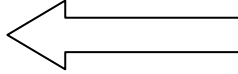

During the 2018 calendar year, we had the below noted violation(s) of drinking water regulations.

Compliance Period	Analyte	Comments
12/30/2018	LEAD & COPPER RULE	LEAD CONSUMER NOTICE (LCR)

Additional Required Health Effects Language:

Nitrate in drinking water at levels above 10 ppm is a health risk for infants of less than six months of age. High nitrate levels in drinking water can cause blue baby syndrome. Nitrate levels may rise quickly for short periods of time because of rainfall or agricultural activity. If you are caring for an infant, you should ask for advice from your health care provider.
